

## Cambridge International AS & A Level

MATHEMATIC	cs		9709/22
CENTRE NUMBER		CANDIDATE NUMBER	
CANDIDATE NAME			

Paper 2 Pure Mathematics 2

February/March 2020

1 hour 15 minutes

You must answer on the question paper.

You will need: List of formulae (MF19)

## **INSTRUCTIONS**

- Answer all questions.
- Use a black or dark blue pen. You may use an HB pencil for any diagrams or graphs.
- Write your name, centre number and candidate number in the boxes at the top of the page.
- Write your answer to each question in the space provided.
- Do not use an erasable pen or correction fluid.
- Do not write on any bar codes.
- If additional space is needed, you should use the lined page at the end of this booklet; the question number or numbers must be clearly shown.
- You should use a calculator where appropriate.
- You must show all necessary working clearly; no marks will be given for unsupported answers from a calculator.
- Give non-exact numerical answers correct to 3 significant figures, or 1 decimal place for angles in degrees, unless a different level of accuracy is specified in the question.

## **INFORMATION**

- The total mark for this paper is 50.
- The number of marks for each question or part question is shown in brackets [].

This document has 12 pages. Blank pages are indicated.

2 (a)	Find the quotient when $4x^3 + 17x^2 + 9x$ is divided by $x^2 + 5x + 6$ , and show that the remains 18.	inder [3]

5

constant.

(a) Sketch, on the same diagram, the graphs of y = |x + 2k| and y = |2x - 3k|, where k is a positive

	Give, in terms of $k$ , the coordinates of the points where each graph meets the axes.	[3]
<b>(b)</b>	Find, in terms of $k$ , the coordinates of each of the two points where the graphs intersect.	[4]

7

The diagram shows part of the curve with equation

$$y = 4\sin^2 x + 8\sin x + 3,$$

where x is measured in radians. The curve crosses the x-axis at the point A and the shaded region is bounded by the curve and the lines x = 0 and y = 0.

(a)	Find the exact $x$ -coordinate of $A$ .	[2]
<b>(b)</b>	Find the exact gradient of the curve at A.	[3]

© UCLES 2020 9709/22/F/M/20

(c)	Find the exact area of the shaded region.	[5]

## **Additional Page**

If you use the following lined page to complete the answer(s) to any question(s), the question number(s) must be clearly shown.		

Permission to reproduce items where third-party owned material protected by copyright is included has been sought and cleared where possible. Every reasonable effort has been made by the publisher (UCLES) to trace copyright holders, but if any items requiring clearance have unwittingly been included, the publisher will be pleased to make amends at the earliest possible opportunity.

To avoid the issue of disclosure of answer-related information to candidates, all copyright acknowledgements are reproduced online in the Cambridge Assessment International Education Copyright Acknowledgements Booklet. This is produced for each series of examinations and is freely available to download at www.cambridgeinternational.org after the live examination series.
